about me

A dedicated JavaScript Developer with 2+ years of experience in developing scalable web and mobile applications. Proficient in modern frameworks like React, React Native, and Next.js, with hands-on experience in TypeScript, Node.js, and NoSQL databases. Skilled in delivering dynamic user experiences and automating complex tasks. Passionate about crafting solutions that blend functionality, performance, and aesthetics.

work experience

SyncClouds

software ux/ui developer | Oct 2024 - Dec 2024

In my capacity as a software developer in this role, I've made significant contributions, gaining valuable experience in team collaboration and a wide range of other skills.

LaymanMax

frontend developer | Feb 2024 - July 2024

I worked as a Frontend developer at LaymanMax, a gaming events company, constantly learning new technologies. I wrote Firebase Cloud Functions in Node.js to manage tournament matches and handle giveaways for players. I also used the latest tech stacks, including Next.js and shadcn/ui, to build SEO-friendly pages.

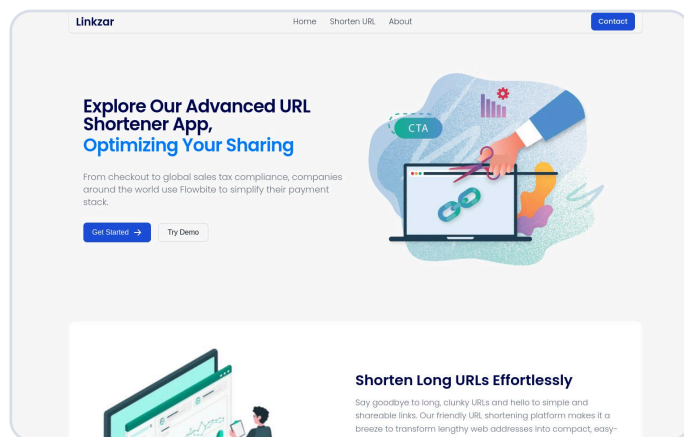

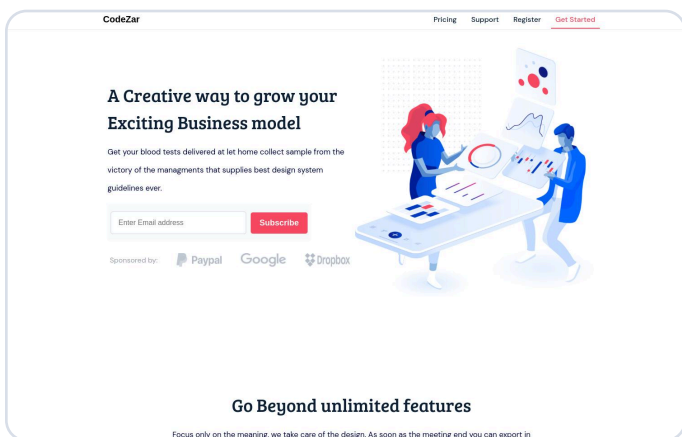

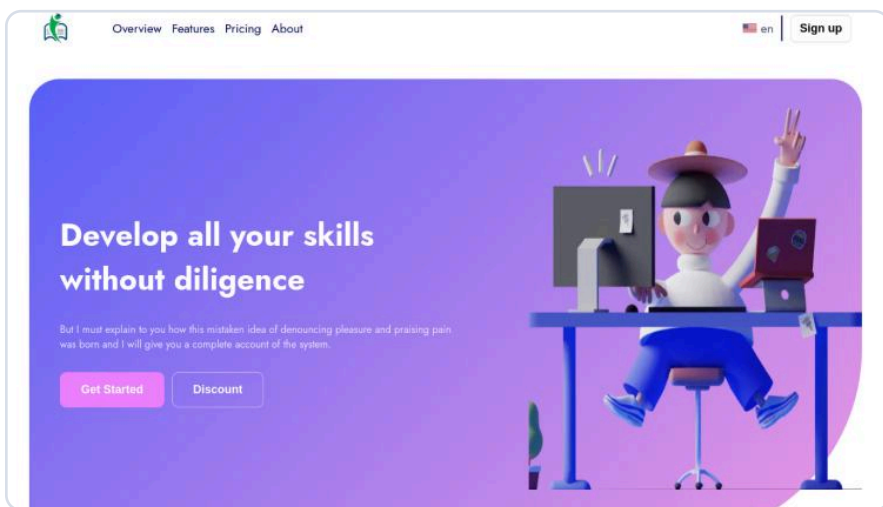

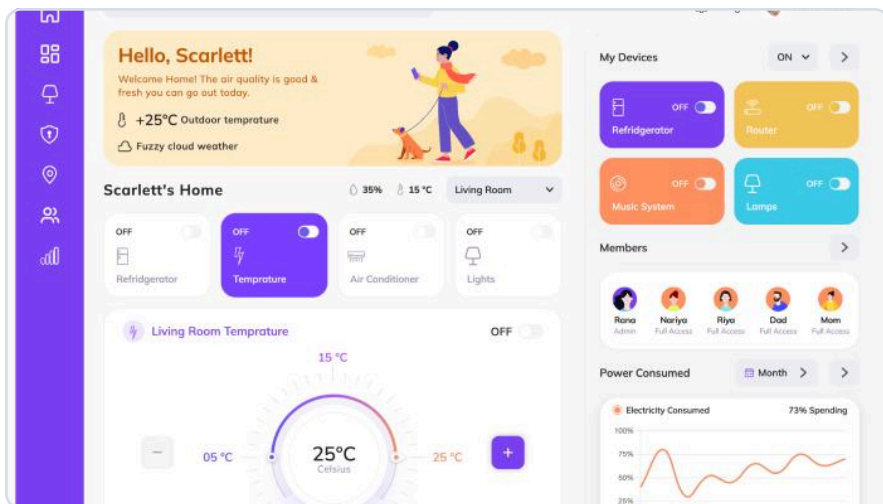

other projects

Linkzar

I have developed a dynamic link shortener web application designed to streamline the sharing of URLs. This tool simplifies long and complex links, making them concise and user-friendly, enhancing the efficiency of web navigation and sharing.
